

# ARYAN NEGI

P Y T H O N   D E V E L O P E R   /   W E B   D E V E L E P O R

## PROFILE

Versatile software developer with expertise in Python, Django, Flask, and full-stack web development. Skilled in designing and implementing scalable backend systems, efficient APIs, AI and data-driven solutions, while also delivering clean and responsive frontend interfaces. Strong in problem-solving, collaboration, and leadership, with excellent communication skills and a proven ability to contribute effectively in dynamic, team-oriented environments.

## PERSONAL PROJECTS

### AI Financial Supporter

Built an AI-powered tool in Python to analyze financial data and provide smart recommendations for budgeting, expense tracking, and decision-making. Focused on delivering clear insights with a scalable backend.

### AI Judge

Designed an AI-based decision support system capable of analyzing data and assisting in structured evaluations. Implemented with Python to simulate reasoning and fairness in judgments.

### E-Commerce Website

Developed a functional e-commerce platform using HTML, CSS, and Python backend. Features included product listing, cart management, and a simple checkout flow, highlighting full-stack web development skills.

### Spotify Liked Songs Playlist Maker

Built a Python app with Spotify API that organizes and generates playlists automatically from a user's liked songs, demonstrating API integration, automation, and clean data handling.

### Motion Detector Drum Player

Engineered a creative computer vision project using Python and OpenCV that transforms motion detection into a virtual drumming experience. Combined real-time tracking with sound integration for an interactive music app.
